

# CDPH supports many STD prevention activities throughout the state.

## A few highlights from 2017

### ● 885,939 condoms delivered

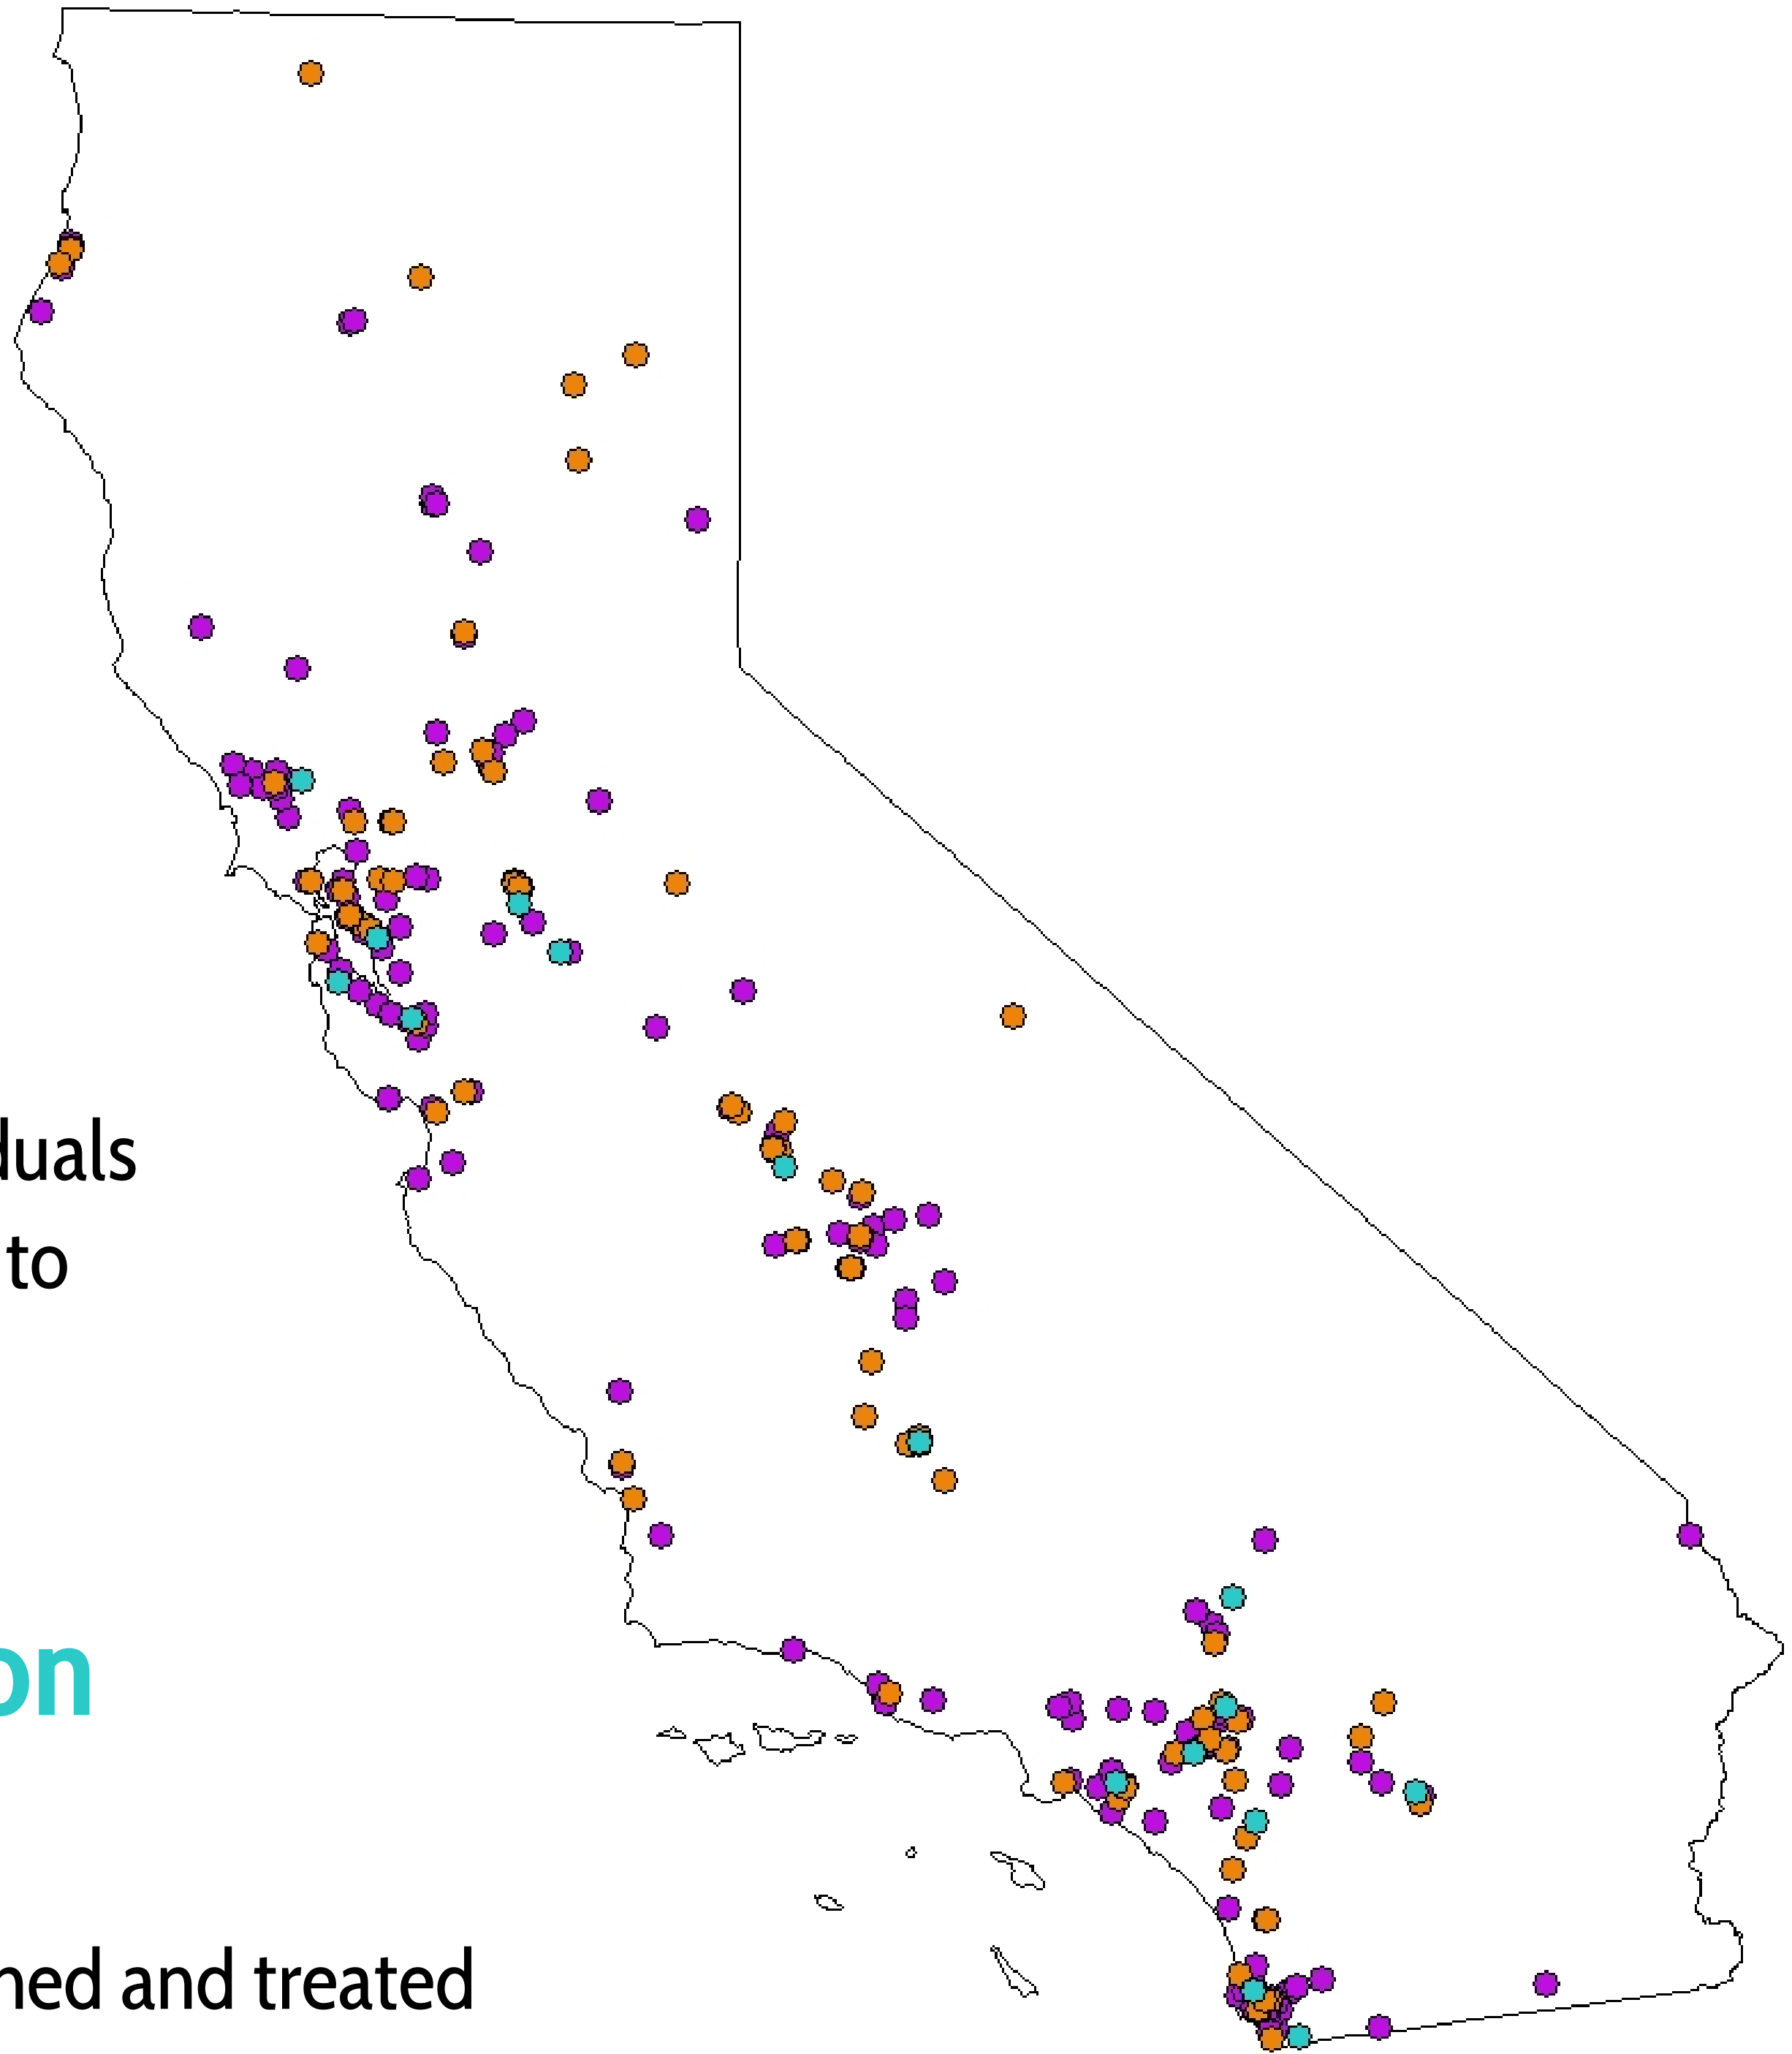

In partnership with Essential Access Health, the Condom Access Project delivered condoms to clinics, public health departments, & homes.

### ● 23,695 expedited partner therapy doses distributed

155 clinics provided partner treatment to individuals who tested positive for chlamydia or gonorrhea to prevent reinfection & ongoing transmission.

### ● 2,615 female youth in detention centers screened

Juvenile detention facilities in 12 counties screened and treated female youth for chlamydia and gonorrhea.

## Additionally...

**434 health educators & 256 medical providers** received training on a variety of topics

such as: STDs/HIV, the rights of youth to access confidential sexual health services, & the CA education code on comprehensive sexual health instruction.
