SANDRA SHEWRY, MPH, MSW  
Acting Director

State of California—Health and Human Services Agency  
**California Department of Public Health**

GAVIN NEWSOM  
Governor

**Statewide Public Health Officer Order,  
August 28, 2020**

On March 19, 2020, the State Public Health Officer issued an order directing all individuals living in the State of California to stay at home except as needed to facilitate authorized activities or to maintain the continuity of operations of critical infrastructure sectors. (See [March 19, 2020 Order](#).) The scope of activities authorized under this order was subsequently modified in additional state public health directives. Then, consistent with Executive Order N-60-20, the State Public Health Officer set out California's path forward from this "Stay-at-Home" Order in California's [Pandemic Resilience Roadmap](#). That Roadmap identified four stages of the pandemic: safety and preparation (Stage 1), reopening of lower-risk workplaces and other spaces (Stage 2), reopening of higher-risk workplaces and other spaces (Stage 3), and finally an easing of final restrictions leading to the end of the stay-at-home order (Stage 4). On July 13, 2020, in response to a significant increase in the spread of COVID-19, the State Public Health Officer ordered the statewide closure of operations in certain high-risk sectors. (See [July 13, 2020 Order](#).) Counties on the County Monitoring List for three consecutive days were also required to close additional indoor operations for certain sectors in order to further slow community transmission.

Community spread of infection remains a significant concern across the state. In addition to the impact on the general population, community spread increases the likelihood of expanded transmission of COVID-19 in congregate settings such as nursing homes, homeless shelters, jails and prisons. Infection of vulnerable populations in these settings can be catastrophic. Higher levels of community spread also increase the likelihood of infection among individuals at higher risk of serious outcomes from COVID-19, including the elderly and those with underlying health conditions who might live or otherwise interact with an infected individual. COVID-19 infection is also disproportionately impacting our essential workforce. The anticipated influenza season is likely to impose additional burdens on the healthcare delivery system, increasing demand for space, supplies, and personnel.

The COVID-19 pandemic continues to evolve, and CDPH is continually monitoring new scientific evidence and improving its understanding of the disease. Based on the current state of the pandemic in California and current scientific understanding of transmission, it is my judgment that it is appropriate to further refine the approach in order to gradually reopen businesses and activities while reducing the risk of increased community spread. A targeted system for sector reopenings which considers both current epidemiological conditions and the latest understanding of transmission risk in certain

sectors will allow CDPH to monitor both counties and sectors for evidence of increased epidemiological risk and will reduce risk as California continues to reopen its economy and protect public health. [California's Plan for Reducing COVID-19 and Adjusting Permitted Sector Activities to Keep Californians Healthy and Safe](#) sets forth in detail the basis for the new Framework.

**NOW, THEREFORE, I, as Acting State Public Health Officer of the State of California, order all of the following:**

1. The updated framework for reopening, which shall be known as California's Plan for Reducing COVID-19 and Adjusting Permitted Sector Activities to Keep Californians Healthy and Safe, will rely on a set of Tiers corresponding to specific epidemiological profiles based on indicators of disease burden including case rates per capita and percent of positive covid-19 tests and proportion of testing and other covid-19 response efforts addressing the most impacted populations within a county. For each progressive Tier, this framework will permit a broader range of reopening guided by risk-based criteria pertinent to each sector. I may modify the epidemiological criteria for each Tier as well as the sectors, businesses, establishments, or activities within the Tiers as necessary based on the latest available public health information and research to protect public health and safety. The up-to-date Tier profiles and those sectors, businesses, establishments, or activities that are permitted to open in each Tier will be posted (along with necessary modifications), at <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/COVID19CountyMonitoringOverview.aspx>.
2. Pursuant to this framework, all local health jurisdictions in the state may reopen specified sectors according to their respective county's Tier. However, a local health jurisdiction that moves to a Tier permitting further reopening must pause for 21 days, or a different period that I identify, before reopening additional sectors.
3. Conversely, a local health jurisdiction must also close sectors according to their respective county's Tier consistent with the timeline and procedures set forth in California's Plan for Reducing COVID-19 and Adjusting Permitted Sector Activities to Keep Californians Healthy and Safe.
4. A local health jurisdiction may continue to implement or maintain more restrictive public health measures if the jurisdiction's Local Health Officer determines that health conditions in that jurisdiction warrant such measures.

## Terms of Orders

5. This order shall go into effect August 31, 2020 and shall supersede the July 13, 2020 State Public Health Officer Order.
6. This order shall remain in effect until I determine it is appropriate to modify the order based on public health conditions.
7. I will continue to monitor the epidemiological data and will modify California's Plan for Reducing COVID-19 and Adjusting Permitted Sector Activities to Keep Californians Healthy and Safe as required by the evolving public health conditions. If I determine that it is necessary to change what will reopen or close, or otherwise modify the Plan, these modifications will be posted at [California's Plan for Reducing COVID-19 and Adjusting Permitted Sector Activities to Keep Californians Healthy and Safe](#).
8. Except to the extent this order or other state public health directives expressly provide otherwise, all CDPH guidance continues to apply statewide.
9. All references in CDPH or other State guidance to the County Monitoring List or the County Data Monitoring List shall refer to those counties falling within Tier 1 of California's Plan for Reducing COVID-19 and Adjusting Permitted Sector Activities to Keep Californians Healthy and Safe.
10. This order is issued pursuant to Health and Safety Code sections 120125, 120130(c), 120135, 120140, 120145, 120150, 120175, 120195 and 131080; EO N-60-20, N-25-20, and other authority provided for under the Emergency Services Act; and other applicable law.
