

New online training on immunization assessment reporting!

Dear Pre-Kindergarten and Child Care Partners,

With the recent [announcement](#) that the California immunization reporting site is open, now is the perfect time to check out our free online training for pre-k and child-care staff to support you through the reporting process! The new training module demonstrates how to:

- prepare for immunization reporting
- complete the Immunization Assessment Worksheet
- use the reporting website.

Check it out on ShotsforSchool.org! (See #7 Reporting Immunizations.) A friendly reminder that early reporting is always encouraged!

Stay tuned for additional modules that will help you and your staff understand immunization requirements and maintain the immunization records of all children at your facility. You can also find resources and materials on ShotsforSchool.org to help you implement immunization requirements.

Sincerely,

California Department of Public Health, Immunization Branch
