

New modules! Online training for school immunization requirements

Dear Superintendents and Administrators,

With the recent announcement that the California immunization reporting site is open for [schools](#) and [child care facilities](#), now is the perfect time to check out our free online training that helps school staff implement immunization requirements. **New modules that cover immunization reporting are now available!** (See #7 *Reporting Immunizations* on the [ShotsforSchool.org](#) training resources page.) The modules demonstrate how to prepare for school reporting, complete the Immunization Assessment Worksheet, and use the reporting website for staff of TK/Kindergarten, 7th Grade, and Pre-Kindergarten (Child Care) facilities. A friendly reminder that early reporting is always encouraged!

Please be sure to notify all schools in your district that these training modules are available to help staff enforce immunization requirements, maintain immunization records of all children enrolled, and assess and annually report the immunization status of their enrollees. You can find additional resources and materials on [ShotsforSchool.org](#) to help implement immunization requirements in your schools.

Sincerely,

California Department of Public Health, Immunization Branch
