California Influenza Surveillance Project Viral and Rickettsial Disease Laboratory 2008-2009

Influenza Update – Week 44 (October 26 – November 1, 2008)

National Influenza Activity:

- Nationwide, a low level of influenza activity was reported in the United States.
- Eleven (0.6%) specimens tested by U.S. World Health Organization (WHO) and National Respiratory and Enteric Virus Surveillance System (NREVSS) collaborating laboratories, and reported to CDC/Influenza Division, were positive for influenza.
- The proportion of deaths attributed to pneumonia and influenza (P&I) was below the epidemic threshold.
- The proportion of outpatient visits for influenza-like illness (ILI) was below national and region-specific baseline levels.
- Fifteen states, the District of Columbia, and Puerto Rico reported sporadic influenza activity; 35 states reported no influenza activity.

California Influenza Activity:

- Influenza activity, including sentinel provider outpatient influenza-like illnesses and Kaiser Permanente P&I (pneumonia and influenza), remains low throughout California.
- Based on reports of infrequent positive influenza laboratory tests in both Northern and Southern California, influenza activity in California remained **sporadic** (defined by the CDC as "Isolated cases of lab confirmed influenza in the state, but ILI activity is not increased").
- No new cases of severe pediatric influenza or pediatric influenza-associated fatalities* were reported this week.

*Age 0- 17 years; a clinical syndrome consistent with influenza or complications of influenza; confirmation by laboratory testing; and have been hospitalized in the ICU or died (with no period of complete recovery between the illness and death.

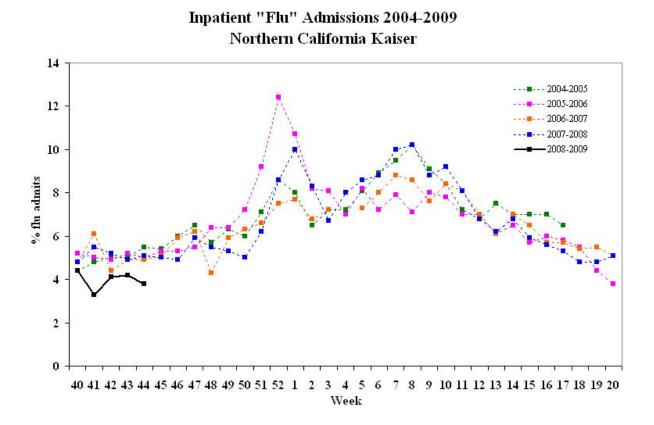

Kaiser Permanente inpatient, sentinel providers' outpatient influenza-like illnesses, and Kaiser Permanente antiviral data:

	Kaiser Inpatient Data % (range)*		Outpatient ILI Kaiser Antiviral Data [§]		
Week	Northern CA	Southern CA	Data %(# reported) [‡]	Northern CA	Southern CA
44	3.8 (0.0–11.1)	2.0 (0.7–3.4)	1.0 (83 reported)	46	70
Previous week	4.2 (2.2–8.2)	1.7 (0.0–3.7)	1.6 (99 reported)	56	59

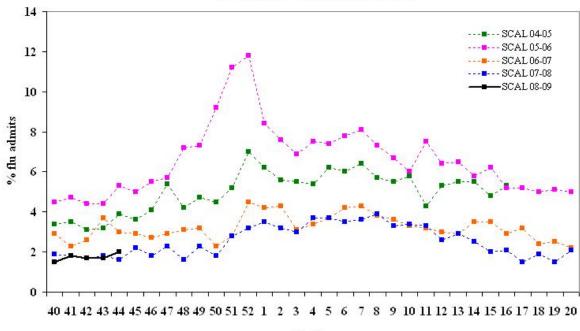

* "Flu admissions" are present year-round. During the off-season, these consist chiefly of pneumonia, which represents approximately 3–5% of all admissions

[‡] The percentage of outpatient visits for influenza-like illness (ILI) is calculated by dividing the number of ILI visits by the total number of outpatient visits per week

[§] The number of prescriptions filled for the antiviral drugs used for influenza (amantadine, rimantadine, zanamivir, and oseltamivir) by Kaiser outpatient pharmacies in California

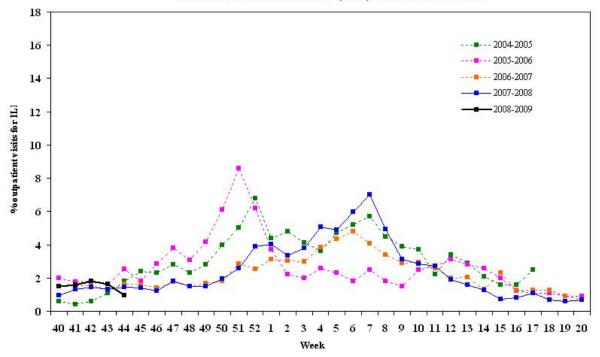

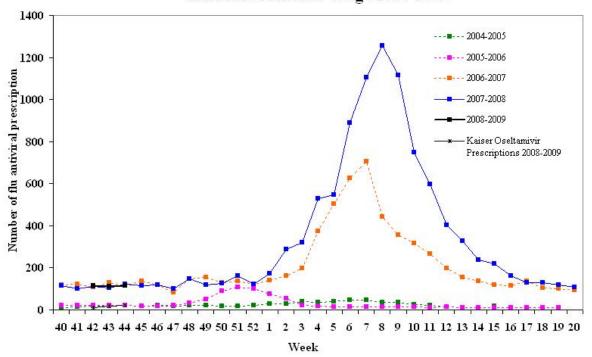

Week

California Sentinel Providers Influenza-Like Illness (ILI) Visits 2004-2009

Kaiser Pharmacy Data Influenza Antiviral Usage 2004–2009

		Sentinel Laboratories/Respiratory Laboratory Network [‡]	Sentinel Providers
Week 44	Number of Sites Reporting	20	11 specimens submitted through week 44 (0 positive by PCR)
	Influenza A	0 Total to date: 1	0
	Influenza B	0 Total to date: 4	0
	Influenza A/B	0 Total to date: 0	0
	RSV	15a Total to date: 28	0
	Other Respiratory Viruses	5 ^b Total to date: 33	0

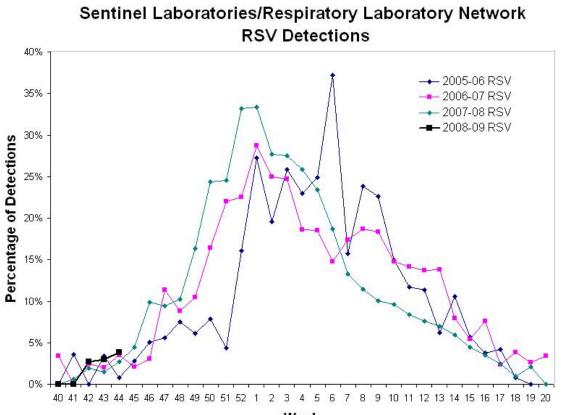

Laboratory Data (viral isolation and detection)

[‡]Sentinel laboratories are hospital, academic, private, and public health laboratories located throughout California that provide data on the number of laboratory-confirmed influenza and other respiratory virus detections and isolations. The Respiratory Laboratory Network (RLN) is a network of 23 local public health laboratories that offer enhanced diagnostic testing with the "R-mix" shell vial assay, which detects several respiratory pathogens, including influenza A and B viruses, respiratory syncytial virus, parainfluenza virus, and adenovirus. Some RLN labs also offer PCR testing for influenza A and B.

Please continue to assist us in recruiting primary care providers (physicians, nurse practitioners, and physician assistants) to be sentinel physicians in your area. For more information, contact Melissa Dahlke at <u>flu@cdph.ca.gov</u> or 510-620-3494.

For questions about the California Influenza Surveillance Project, please contact Erica Boston (erica.boston@cdph.ca.gov) or Janice Louie (janice.louie@cdph.ca.gov).
