### **Hunters Point Naval Shipyard Parcel A-1, Radiation Health and Safety Scanning Survey: Progress Update #12**

For the week of October 8, the CDPH Radiological Health Branch continued the walkover survey scanning of the construction area, bounded by Kirkwood Avenue, Jerrold Avenues, and Friddell Street. No anomaly was detected during this week's scan. In total, approximately 97% of the walkover survey area has been scanned. The developer is relocating construction materials to enable completion of the scan of this last remaining area.

Additionally, staff completed the data analysis from the Towed Array RS 700 that was used to scan streets, paved areas, or other outdoor flat surfaces. In total, the Towed Array RS 700 detected 49 anomalies, and all 49 were found to be potassium-40, a naturally occurring substance that does not pose a hazard to people or the environment.

The fieldwork for Parcel A-1 is nearly complete and our staff will now focus on preparing the final survey report for completion in late fall. CDPH staff are also preparing to begin scanning Parcel A-2, an open undeveloped area west of Parcel A-1.

Similar to the A-1 scan, CDPH has prepared a work plan for the A-2 scan as well as a summary document and a FAQ. These documents are posted on our website: <https://www.cdph.ca.gov/Programs/CEH/DRSEM/Pages/RHB-Environment/Hunters-Point-Naval-Shipyard-Parcel-A-1-Survey.aspx/#>. While CDPH plans to begin the A-2 scan on October 22, 2018, we will accept and consider your input throughout the project. Any input can be sent to the email address indicated below.

CDPH appreciates residents' assistance to facilitate this survey effort. As always, questions or comments about this project or the upcoming A-2 scanning can be sent to: [RHBHuntersPointParcelAScan@cdph.ca.gov](mailto:RHBHuntersPointParcelAScan@cdph.ca.gov)

Sincerely,

A handwritten signature in black ink, appearing to read "Mark Starr". The signature is fluid and cursive, with a prominent horizontal stroke at the end.

Mark Starr, DVM, MPVM, DACVPM
